**Correction to:** Eur J Plant Pathol.  
<https://doi.org/10.1007/s10658-020-02114-6>

This erratum is published as author overlooked inclusion of minor correction during proofing.

Two minor changes should be incorporated into the article:

1. In the section of **Materials and Methods** the following bolded sentence should be added after this paragraph: “Number of copies = (amount in nanograms  $\times$   $6.022 \times 10^{23}$ ) / (length of amplified DNA fragment in base pairs  $\times 1 \times 10^9 \times 650$ ). The average molecular

weight of a base pair is assumed to be 650 Da (g/mol) and Avogadro number is  $6.022 \times 10^{23}$  molecules/mol.”  
**To obtain TYLCV genome copy numbers, data from dsDNA quantification were multiplied by two because TYLCV contains a single-stranded DNA (ssDNA) genome.**

2. In **Acknowledgements** section the name of “**Dr. Seyed Ali Akbar Behjatnia**” should be added:

The authors would like to thank Dr. Hamed Hasanzadeh Khankahdani, Dr. Majid Siampour, Dr. Habibollah Hamzeh-Zarghani, Dr. Mohsen Amiri and **Dr. Seyed Ali Akbar Behjatnia** for their helpful advices on various technical issues examined in this paper.
