

Information for Authors

CHECK THE PES AUTHOR'S KIT (<http://www.ieee.org/pes>) FOR THE LATEST DETAILS.

The IEEE Power & Energy Society (PES) publishes three bi-monthly publications: IEEE TRANSACTIONS ON POWER DELIVERY, IEEE TRANSACTIONS ON POWER SYSTEMS, and IEEE TRANSACTIONS ON SMART GRID, and two quarterly publications: IEEE TRANSACTIONS ON ENERGY CONVERSION and IEEE TRANSACTIONS ON SUSTAINABLE ENERGY. The areas covered by the IEEE TRANSACTIONS ON SMART GRID are enumerated below. The areas covered by the other TRANSACTIONS can be found in Part 2 of the PES Author's Kit.

Paper Preparation

Basic guidelines for preparing papers for the IEEE Power & Energy Society are provided in Part 4 of the Author's Kit. Information is given regarding desktop publishing format, type sizes, and typefaces. Style rules are provided that explain how to handle equations, units, figures, tables, references, abbreviations, and acronyms. Sections are also devoted to the preparation of acknowledgments, references, and authors' biographies. An example of the desired layout for papers is provided in PDF format and as a Microsoft Word template. English language editing services can help refine the language of your article and reduce the risk of rejection without review. IEEE authors are eligible for a 10% discount at American Journal Experts; visit <http://www.aje.com/go/ieee/> to learn more. Please note these services are fee-based and do not guarantee acceptance. The articles in this journal are peer reviewed in accordance with the requirements set forth in the [IEEE PSPB Operations Manual](#) (sections 8.2.1.C & 8.2.2.A). Each published article was reviewed by a minimum of two independent reviewers using a single-blind peer review process, where the identities of the reviewers are not known to the authors, but the reviewers know the identities of the authors. Articles will be screened for plagiarism before acceptance.

TRANSACTIONS papers are limited to eight pages at submission. If a paper becomes longer than eight pages after review, it will be subject to mandatory page charges.

English Language Editing Services

English language editing services can help refine the language of your article and reduce the risk of rejection without review. IEEE authors are eligible for discounts at several language editing services; visit the [IEEE Author Center](#) to learn more. Please note these services are fee-based and do not guarantee acceptance.

Graphical Abstract

This journal accepts graphical abstracts and they must be peer reviewed. For more information about graphical abstracts and their specifications, please visit the following link: http://www.ieee.org/publications_standards/publications/graphical_abstract.pdf

Submission Information

An author submits a manuscript by uploading a word processing file (.doc, .rtf, or .ps) of the paper directly onto ScholarOne Manuscripts, a site on the World Wide Web where papers can be accessed by the TRANSACTIONS Editors-in-Chief, Editors, and Reviewers. It will be converted to a PDF file by the system. (*It is recommended that the PDF file be under 1 MB. Papers exceeding this file size may require a longer review time.*) See Part 2 of the Author's Kit for complete instructions.

ORCID Required

All IEEE journals require an Open Researcher and Contributor ID (ORCID) for all authors. To create an ORCID, please visit: <https://orcid.org/register>. The author will need a registered ORCID in order to submit a manuscript or review a proof in this journal.

Upon Acceptance

Upon acceptance of a paper for publication, the author is required to upload the following final files to ScholarOne Manuscripts: 1) Latex or Microsoft Word source file of the paper; 2) PDF file of the paper; 3) separate graphics files in Word, eps, ps, tiff, ppt or Excel format if the graphics are not embedded in the source file; 4) biosketches and photos of all authors. In addition, the author will be required to submit a completed IEEE Copyright Form electronically via ScholarOne Manuscripts if it was not completed during the initial submission of the paper. A proof of the paper will be sent to the corresponding author for review and approval.

Post-Acceptance

If your article is accepted for publication, you will receive emailed instructions regarding your next steps. You may be asked to upload final production-ready files. Shortly after final files are uploaded, you will receive your article proofs for final review, along with instructions on how to review your proofs and submit any corrections. Please note that major changes to your article, including the list of references, are not permitted after the article is accepted for publication. Please contact the Editor-in-Chief if you have any doubts about whether a modification you wish to make is appropriate.

A publication-ready PDF of the manuscript will appear as an Early Access article on IEEE Xplore. The publication-ready PDF must match the source file. This PDF file must be made following all IEEE guide styles.

Discussions and Closures

The IEEE PES Executive Office handles the submission of discussions and closures. Please see Part 5 of the Author's Kit for complete submission requirements and deadlines. It is recommended that discussions and closures be limited to one formatted page including figures and tables, though contributions of up to 1500 words will be accepted. Discussions and closures may be rejected if they exceed the page limit and they must be submitted to the IEEE PES Executive Office by the deadline date. The IEEE PES Executive Office will forward copies of all written discussions to the corresponding author of the subject TRANSACTIONS paper and will request that a written closure be submitted. Closures must be submitted within three weeks (five weeks outside of North and Central America) of the request. If there is no response by the deadline, it will be assumed that no closure will be supplied.

Power Engineering Letters

This section of the TRANSACTIONS offers a vehicle that speeds publication of new results, discoveries, and developments. The section affords authors the opportunity to publish contributions within a few months of submission to ensure rapid dissemination of ideas and timely archiving of developments in our rapidly changing field. Original and significant contributions in applications, case studies, and research in all fields of power engineering are invited. Of specific interest are contributions defining emerging problems and special needs in specific areas. Authors are encouraged to submit contributions to the Letters Section offering new insight to established techniques, concepts, and methodologies in electric power engineering. Such contributions are distinctly different from discussions of papers recently published in the TRANSACTIONS, in that the former seek to broaden the scope, and point to potential enhancements to existing and established technologies.

Submissions are limited to three formatted pages. Those exceeding this limit will not be reviewed. An author submits a manuscript by uploading a word processing file (.doc, .rtf, or .ps) of the letter directly onto Manuscript Central where it can be accessed by the Power Engineering Letters Editor-in-Chief, Editors, and Reviewers. It will be converted to a PDF file by the system. See Part 2 of the Author's Kit for complete instructions.

PES Letters are limited to 3 pages upon submission. A 4th page may be added to respond to reviewer comments. If, in the revision and editing processes, the Letter exceeds 3 pages, the author will be charged \$150.00 for the fourth page. The authors should strictly follow IEEE format and template so that the length of an accepted letter is not likely to exceed 4-page after revision and editing. Any letter more than 4-page in length will not be accepted for publication. If in editing/formatting the letter becomes 5 pages, Pubs and authors need to work with EIC to reduce the content to fit to 4 pages.

Copyright

It is the policy of the IEEE to own the copyright to the technical contributions it publishes on behalf of the interests of the IEEE, its authors, and their employers, and to facilitate the appropriate reuse of this material by others. To comply with United States copyright law, authors are required to sign and submit a completed IEEE Copyright Form. This form returns to authors and their employers full rights to reuse their material for their own purposes.

Open Access

This publication is a hybrid journal, allowing either Traditional manuscript submission or Open Access (author-pays OA) manuscript submission. Upon acceptance, if you choose to have your manuscript published as an Open Access article, you commit to pay the \$2,045 OA fee for publication in order to enable unrestricted public access. Any other application charges (such as over-length page charge and/or charge for the use of color in the print format) will be billed separately once the manuscript formatting is complete but prior to the publication. If you would like your manuscript to be a Traditional submission, your article will be available to qualified subscribers and purchasers via IEEE Xplore. No OA payment is required for Traditional submission. Corresponding authors from low-income countries are eligible for [waived or reduced open access APCs](#).

Mandatory Page Charges

The author or his/her company or institution will be billed \$150 per each page in excess of the first eight published pages. Payment of these charges is not negotiable or voluntary. Further, submission by the author of his/her manuscript to these TRANSACTIONS signifies acceptance of the requirement to pay mandatory page charges. The Publisher holds the right to withhold publication of the current submission or any future submissions from the author if this charge is not honored.

Corresponding authors from low-income countries are eligible for [waived or reduced APCs](#).

Color Charges

IEEE now offers the option to print figures in grayscale but post online free of charge. Any color figures submitted will be automatically processed by IEEE for online color. Figures may also be printed in color for a charge of \$275 per figure. The corresponding author of the article will have the opportunity to address the color-in-print option during an "Article Setup" step. All invoices and payments are handled through an automated payment portal system. The payment portal allows various payment types such as credit card, bank wire transfers, check, pre-approved waivers, special payment circumstances, and third party billing. Please note that split payments are not supported at this time. If you have any questions, please contact oaprocessing@ieee.org for Open Access processing and reprints@ieee.org for all other charges.
